We're Movin' at a Good Pace

We're moving at a good pace. J. K. Tobin Construction Company is scheduled to complete the site work by August 2020. This means they will clear about 14 acres which includes:

- Grading the entire construction site, laying the stone sub-base for the access road, 286-car parking lot and walkways.
- Laying the asphalt binder on the 900 ft access road so you can visit the building

We will do our best to keep you updated weekly with the progress of the Islamic Community Center

site.

- Bringing water and sewer lines near the building to be connected to the Town plumbing once the building construction starts.
- Building storm water detention

ponds, laying topsoil and seeding the entire disturbed land.

At the rate they are going it is possible they may complete work before the deadline.

A lot of community members have ventured to the site. It is not advisable because it is a work zone and is very wet, as you can see from the photos. Soon, it should clear enough that we can have a ground breaking ceremony for the community without much hardship. Although, in the meantime do pass by the site to see the progress and make dua!
