Site News

ISCNY President is with the Construction Manager from JK Tobin Construction Co. He oversees the work at the Islamic Community Center and schedules the site work for a timely and efficient job. As you can see the workers have practically cleared the driveway and acreage for the center.

JK Tobin Construction Co., is a local company in Jamesville specializing in site development, earthwork and installing utilities. The photos show

their equipment cleared the land of the trees and brush; graded the contour of the driveway leading up to the center; laid drainage pipes and connected to water and sewage. One of their recent projects was the Jamesville-DeWitt Community Library. Soon, when the earthwork nears completion we can access the site comfortably. Right now it is still muddy, so be careful if you venture out now and can't wait.

That's a lot of land!

And a Beautiful Sunset

We will do our best to keep you updated weekly with the progress of the
Islamic Community Center
