ISCNY Community Center Update

10-23-2020

The ISCNY Community Center Master Plan

The ISCNY Community Center committee has developed a Master Plan, which lays out the overall project, and how the entire 46 acres can be developed. The main objective is the ISCNY Community Center that the work has been done to prepare the site. The Master Plan gives you the big picture.

There are two other areas that the committee is planning to develop in the near future. That is the cemetery and the soccer field. Both of these are shown on the Master Plan on this page. The cemetery

is a needed service and will not only be a service but an asset for the center. It will relieve us of reliance on outside cemeteries and save expenditure to them for each burial. You can see a plot laid out on the east side of the acreage and an additional plot on the north side for future use. The soccer field and outdoor basketball is also on the planning table. So you can start forming your league competition to be played here instead of elsewhere.

The Master Plan shows so much for the future contribution of Muslims to the Central New York community. I know you want to be a part of the future.
