ISCNY Community Center Update

9-18-2020

ISCNY Community Center Site, Then And Now

The ISCNY Community Center planning committee developed a master plan for the center. The master plan is a conceptual plan that gives the overall placement and road map for construction. It also shows the possible items and what space they can best occupy.

The ISCNY Community Center master plan shows the center and mapped space for cemeteries, soccer field, outdoor basketball and community garden. In addition it shows a sub-divided 10.3 acre lot and the best things that can prosper on it. This gives you a good idea—mental picture, of what the finished project can be. Hopefully you can see yourself in this picture.

The photos show the before and after. The cleared land is a vast improvement over the dense forestation, and helps you see the manifestation of the master plan.

We will do our best to keep you updated weekly with the progress of the ISCNY Community Center

HELP BUILD THE ISCN Y COMMUNITY CENTER

The ISCN Y logo on the bottom right of each page is interactive and will take you to the ISCN Y web page where you can make a secure donation.
